

First Aid Foot Kit

The First Aid Foot Kit of Care Plus® provides the ideal protection during hiking, trekking and sports. The Kit contains the Care Plus® Anti-Blister Spray and the Care Plus® Foot Powder, combined in one package.

CARE PLUS® ANTI-BLISTER SPRAY

To truly minimize the chance of developing blisters, use Care Plus Camphor Spray every day starting three weeks before you leave. Spraying your feet on a daily basis will toughen the skin and help to prevent blisters. After all, prevention is better than cure! The spray cools, refreshes and relieves tired muscles and feet during and after long walks. Can also be used to clean skin before affixing a plaster.

Ingredients: Camphor, Alcohol denat.

CARE PLUS® FOOT POWDER

You can prevent blisters by wearing comfortable shoes that fit properly, but even with the necessary precautions, you can still develop blisters after a long walk or a hike. To prevent this, treat your feet with Care Plus Foot Powder before you set off as this foot powder absorbs moisture, keeps the feet dry, and helps to prevent blisters. It also cools skin and reduces and prevents a burning sensation. Dust feet with foot powder before and during long walks and hikes. Air-dry feet before applying the foot powder and remove any excess powder before putting on socks. Ideal for dusting around the edges of bandages and tape to prevent clothing from sticking.

Ingredients: Talc, Menthol

IN SHORT

- Cools, freshens and eases tired muscles and feet
- Dries the feet and helps to prevent blisters
- Hardens the skin, so preventing blisters.
- Cleans the skin to increase adhesiveness of plaster.
