

# **care PLUS** First Aid Travel Compression Socks

Do swollen ankles and feet bother you if you must sit in a car, bus, train or plane for several hours?

You can fight this with Care Plus® Travel Compression Socks. If you stand up or sit down for a long time and get little movement, your blood vessels will be cut off and the return of the blood to the heart will slow down. The Care Plus® Travel Compression Socks stimulate blood and fluid circulation and thus prevent stagnation in the feet and lower legs, a major cause of thrombosis.

They're snug-fitting and are composed of different compression zones to provide optimal performance and comfort.

Always wash after use to maintain fiber life and compression. Do not use fabric softener or bleach.

## IN SHORT

- Stimulate fluid and blood circulation in feet and lower legs
- Comfortable at high and low temperatures
- Seamless
- Keep feet fresher for longer
- Suitable for daily use
- Reinforced toe and heel design
