

care PLUS[®]

Bio Anti-Tick

Care Plus[®] Anti-Tick is a tick repellent based on a natural active ingredient, Eucalyptus Citriodora Oil, and is suitable for children aged three months and older.

Care Plus[®] Anti-Tick is a very effective product that offers up to six hours of protection against tick bites. The extracts' effectiveness has been demonstrated in scientific laboratories and field studies.

Anti-Tick has had no reported side effects and offers the best protection against ticks for children and women who are pregnant or breastfeeding.

Care Plus[®] Anti-Tick has been registered as a biocide and the product complies with all safety requirements for humans, the environment and effectiveness of use, provided it is used as instructed. Please read the label and instructions before using the product. The availability of Care Plus[®] Anti-Tick depends on local biocide regulations.

A tick is a spider-like arthropod parasite. Ticks can be found in the garden, in the fields while trailing and in the forests during walking. It feeds on the blood of animals and people. A tick can transmit bacteria, viruses and parasites while sucking blood. *Borrelia burgdorferi*, the cause of Lyme disease, is the most well-known and dangerous bacterium that may be present in a tick. A red ring around the bite area (Erythema migrans) may be one of the first symptoms of Lyme disease. This disease can eventually lead to serious health complaints.
