

The Care Plus® Click-Relief reduces itching and swelling after bites or stings from insects and jellyfish, without the use of creams or chemicals. Care Plus® Click-Relief works with piezoelectricity; when the activation button of the device is pressed, electrical micro-impulses are released. Applied to a bitten area, it helps reduce itching and swelling and stops the urge to scratch. The itching reduces within a few minutes. No batteries are required to function. Lasts up to 5,000 treatments.

Warning: Care Plus® Click-Relief is a medical device, please read the enclosed instructions for use before use. **DO NOT USE:** on patients wearing a cardiac pacemaker, implanted defibrillator, or other implanted metallic or electronic device; on patients diagnosed with heart disease or epilepsy; on pregnant women; on children under 6 months. **DO NOT USE:** on open wounds or rashes, or over infected or pathological or abnormal skin conditions, on bleeding or secreting areas and on mucous membranes; near flammable liquids or gas or if you have used an insect repellent and/or flammable substances (for example: perfume, deodorant, etc.), as this device can ignite flammable substances; with wet hands or on wet skin. Do not use/use with caution: on or around sensitive areas such as mouth, tongue, eyes, ears, internal part of the wrists or palms, fingertips, etc.; if you are sensitive to electric stimulus. Keep it out of reach of children or people with limited sensorimotor skills.
